

### USE & APPLICATION:

Electric Motor, Submersible Pump, Ball Bearing Factory, Repairing Workshop, Auto Service Station & Industrial Work, Like Pressing, Bending, Straightning, Embossing, Broaching of Steel, Iron, Plastic, Rubber etc.

### FRAME:

Column and Bottom are Fabricated from Heavy Mild Steel. The working table is operated vertically and Adjusted by worm winch. Rollers are provided easy Heavy work.

### CYLINDER:

Hydraulic Cylinder is made out of Seamless pipe with Accurate Boring, Grinding, Honing and Piston from special Rigid Steel with the same Accuracy, with PU 'U' Seals Caps/Chevron Packing and Rubber O-Ring etc. Socket is provided for DIA-PUNCH work.

### HAND PUMP:

Double Plunger Pump gives Quick Ram Travel with Low Pressure and Slow Speed Develops with High Pressure Plunger.

### POWER PACK:

Required Power Pack is Provided with Gear Pump, Vane Pump, Plunger Pump, Control Valve, Connecting Hose Pipes, Pressure Meter etc.

### PRESSURE ADJUSTMENT:

Pressure on Piston Rod can be adjusted from 5% to Maximum pressure by safety valve.

### SYSTEM OPERATION:

Hydraulic press is available in hand operated or motorised operated system & Ele. control panel operated.

**Note :** As day to day improvements are contemplated for better performance of the machine, we reserve the right to alter the specifications and all dimensions are without prior notice.
